## Summary

I am a passionate developer specializing in java and backend technologies like Spring Boot and Hibernate. With expertise in Java and C++ programming, I also excel in web development using HTML, CSS, JavaScript, Node.js, and React.js. I am proficient with tools like Docker, Kubernetes, and GitHub, and skilled in databases like MySQL and MongoDB. Eager to launch my career as an entry-level Software Engineer, I aim to contribute to a technology-driven organization while continuing to grow my Java expertise.

---

## Technical Skills

**Programming Languages:** Java,C++

**Web Technologies:** HTML, CSS, JS

**Frameworks:** Node.js, Bootstrap, React.js, Spring Boot,DotNet

**DevOps Tools:** Docker, Kubernetes, Git

**Database Management:** MySQL, MongoDB

**Other Skills:** DSA, Linux, SDLC

---

## Education

**PG Diploma in Advanced Computing (PG-DAC)**

CDAC ACTS Pune | Aug 2024 – Feb 2025/64.5%

**Bachelor of Technology (BTech) in Computer Science and Engineering**

Dr. Babasaheb Ambedkar Technological University, Lonere | 2020 – 2024 | CGPA: 8.88

**Higher Secondary Certificate (HSC) - CBSE**

Kendriya Vidyalaya O.F Bhusawal | 2019 – 2020 | Percentage: 71.8%

**Secondary School Certificate (SSC)**

Central Rly Sr.Sec School Bhusawal | 2017 – 2018 | Percentage: 71.8%

---

## Projects

**Go Courier**

SpringBoot,ReactJs,MySql

Project consists of 4 modules administrator, courier company, customer, delivery person. Admin can login and register multiple courier companies.courier company can add delivery person at same time customer can login and register at any time. courier company can enter details and assign delivery person task. delivery person can update status like out of delivery through his login.

**Portfolio Stock Management System**

Html, Css, JavaScript, MYSQL, Bootstrap.

A complete Stock Management System should not store the information about the product and Suppliers but also have an alert System when the stock level goes low and should also include a billing and a report preparing unit.

**Book Management System**

Java,C++

The Book Management System in C allows users to efficiently manage book records by adding, removing, searching, updating, and displaying books based on attributes like Book ID, Name, Author, Price, and Rating. It includes features for retrieving books by a specific author, updating book details (Price and Rating), and displaying the top 3 books based on price and rating. Users can also view all books in the system, making it easy to organize and access book information. This system ensures efficient management and easy retrieval of book data.
